1. To all whom it may concern, i, a living man known as mr-clayton-m from city of las vegas clark county, nevada, of sound mind and body, a man of age, not indigent, not penniless, a landlord having been born on the portion of the North American Continent claimed by the united States of America and united States Minor Outlying Islands claimed by Jamaica and under their political dominion and more particularly on the land area recognized to be under the political dominion of the district of kingston or district of kingston jamaica, and having been born politically free and politically independent, i claim to have been born one of the progeny of the People of the United States as they styled and established themselves in the Preamble of The Constitution for the united States of America and am one of the free, sovereign, and independent people of the United States as defined in The definitive Treaty of Paris, 1783, and am a beneficiary—not of any Public Charitable Trust—but of The United States Trust; i do freely and under penalty of perjury under the Common Law declare that i have never, ever, willingly, knowingly, and intentionally—having first been fully informed of the negative consequences—voluntarily subjected myself or my property to the authority of the British Crown nor the Government of Jamaica nor and any other artificial political or religious or commercial incorporation and i see no convincing evidence that i ever engaged in any process of naturalization as mandated by United States Statute-at-Large stipulated in the public record at SEVENTH CONGRESS, Session 1, Chapter 28, Sections 1-4, April 14, 1802, which would serve to make me or anyone in my family any form of United States Citizen however styled.

2. As a beneficiary of The United States Trust merely administered by The United States of America, i am entitled and enabled to take against any codicil of the Will established by other beneficiaries and i here declare that i have taken **umbrage (offense or annoyance)** against both the Constitution of the United States of America **charter** and its various **By-Law Amendments** made since 1868 and **the New Deal** announced by Franklin Delano Roosevelt in 1933, and i here declare that i have taken **umbrage (offense or annoyance)** against both the Constitution of Jamaica **charter** and its various **By-Law Amendments** made since 1962.

3. If there should be any evidence to the contrary, let it here be established that any such evidence would only be in existence due to fraud and non-disclosure and adhesion and other improper, unlawful, and illegal contracting practices forbidden by the Common Law, the Law of Admiralty, and the United Nations Convention on Contracts for the International Sale of Goods, and all those United Nations Declarations and Treaties that the United States of America, Incorporated, has agreed to—resulting in press-ganging, inland piracy, unlawful conversion, and secretive change of political status resulting in

theft from me, the **Holder in Due Course** of my paramount identity, and Breach of Trust owed to me. These criminal acts of non-disclosure and **self-interested omission** resulting in falsified evidence are not consensual, not to my advantage, and not of my intentional making. By many Maxims of Law all such evidences, claims, and contracts are void **ab initio (from the beginning)** and those advancing such claims would be admitted criminals.

4. Any such documents that might be ascribed to me are lawfully authorized under the universal **Law of Necessity** as the fruit of the fraudulent practices and claims set forth in the paragraph above and such documents, if there be any, do not established any valid contract or agreement rendering me subject to any foreign power nor serve to make me a debtor, voluntary conscript, or chattel acting as surety for any artificial **en ligis (creature of the law, artificial person) entity**.

8. "Man, know thyself in true proportion"
Oracle of Delphi

Father - The term sperm refers to male reproductive cells and is derived from the Greek word (σπέρμα) sperma (meaning "seed"). In the types of sexual reproduction known as anisogamy and oogamy, there is a marked difference in the size of the gametes with the smaller one being termed the "male" or sperm cell. A uniflagellar sperm cell that is motile is referred to as a spermatozoon, whereas a non-motile sperm cell is referred to as a spermatium. Sperm cells cannot divide and have a limited life span, but after fusion with egg cells during fertilization, a new organism begins developing, starting as a totipotent zygote. The human sperm cell is haploid, so that its 23 chromosomes can join the 23 chromosomes of the female egg to form a diploid cell. In mammals, sperm develops in the testicles and is released from the penis.

Mother - The ova are developed from the primitive germ cells which are imbedded in the substance of the ovaries. Each primitive germ cell gives rise, by repeated divisions, to a number of smaller cells termed oogonia, from which the ova or primary oöcyte are developed. Human ova are extremely minute, measuring about 0.2 mm. in diameter, and are enclosed within the egg follicles of the ovaries; as a rule each follicle contains a single ovum, but sometimes two or more are present. By the enlargement and subsequent rupture of a follicle at the surface of the ovary, an ovum is liberated and conveyed by the uterine tube to the cavity of the uterus. Unless it is fertilized it undergoes no further development and is discharged from the uterus, but if fertilization take place it is retained within the uterus and is developed into a new being. Note: Mitochondrial DNA is matrilineal.

The "First" of Myself - A zygote (from Greek ζυγωτός zygōtós "joined" or "yoked", from ζυγοῦν zygoun "to join" or "to yoke"), is the initial cell formed when two gamete cells are joined by means of sexual reproduction. In multicellular organisms, it is the earliest developmental stage of the embryo. A zygote is always synthesized from the union of two gametes, and constitutes the first stage in a unique organism's development. Zygotes are usually produced by a fertilization event between two haploid cells - an ovum (female gamete) and a sperm cell (male gamete) - which combine to form the single diploid cell. Such zygotes contain DNA derived from both parents, and this provides all the genetic information necessary to form a new being.
